

PLACES FOR EAT PIZZAS

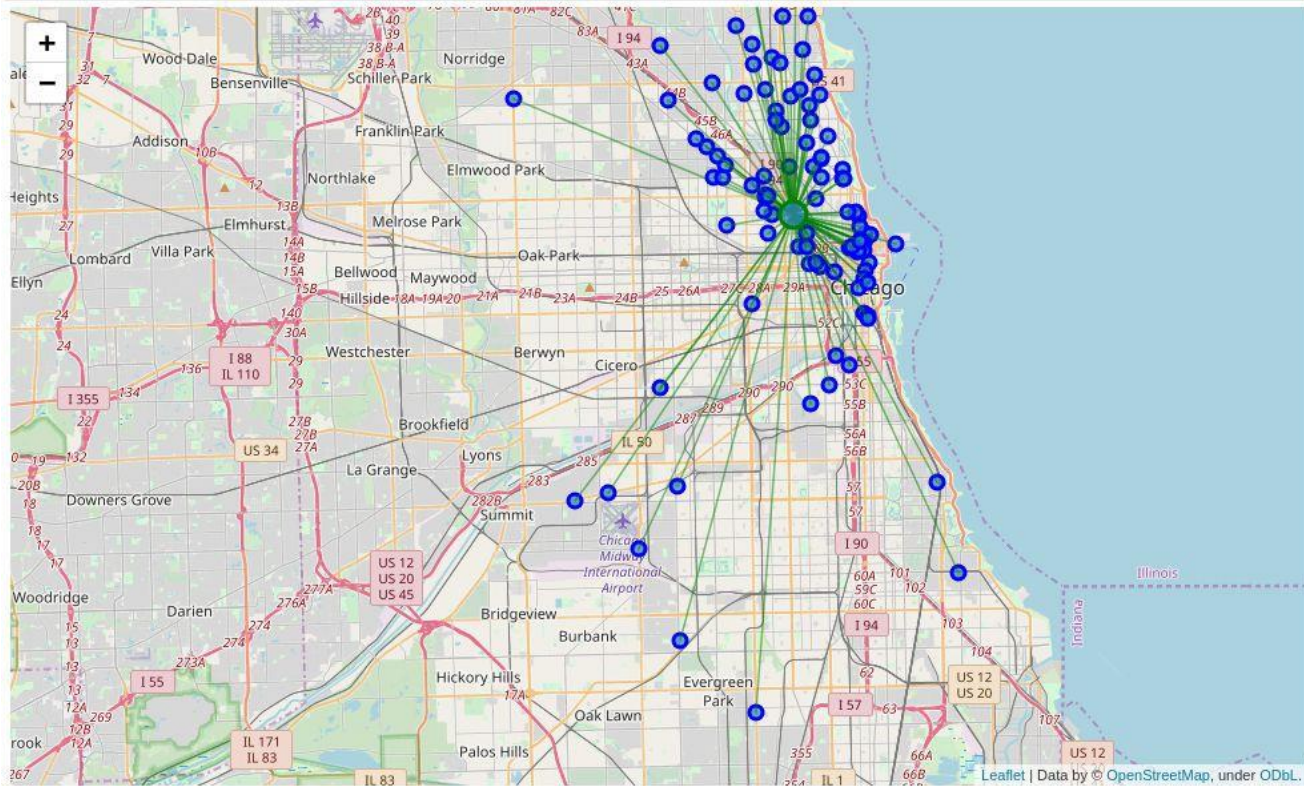

Krisna Manggala

POSSIBLE CITIES

- New York, NY
- San Francisco, CA
- Jersey City, NJ
- Boston, MA
- Chicago, IL

The map displays the distribution of 1000 random points across the New York City metropolitan area. The points are heavily clustered in Manhattan, particularly in the central and southern regions, indicating a high density of points in these areas. The map also shows surrounding areas like New Jersey and Connecticut, with labels for various cities and towns. Major roads and water bodies are also visible.

CHICAGO

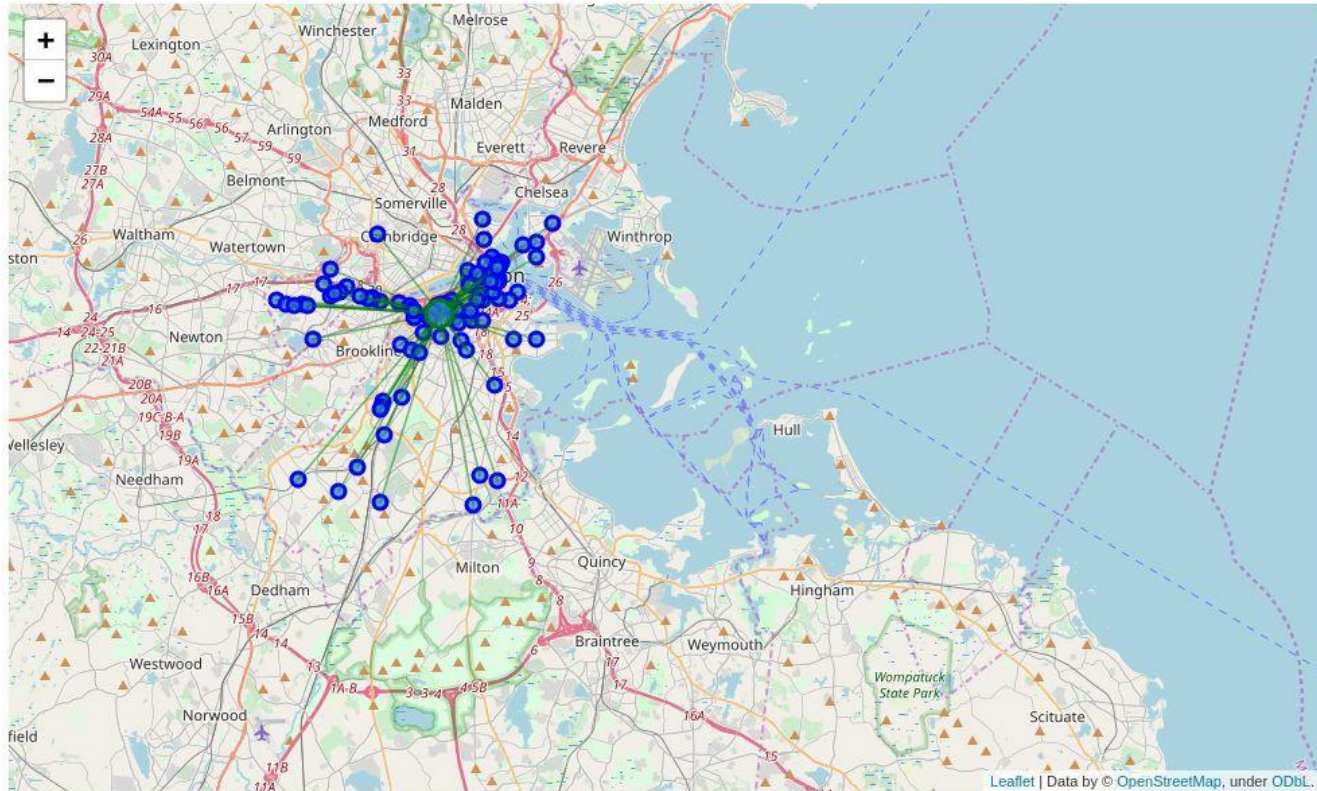

A map of the San Francisco Bay Area, centered on the San Francisco Peninsula. A dense cluster of blue dots, representing data points, is concentrated in the central part of the peninsula, particularly around the city of San Francisco. The map shows various geographical features, including the Golden Gate, San Francisco Bay, and surrounding cities like Mill Valley, Berkeley, Oakland, Alameda, San Francisco, and San Bruno. Major highways such as I-80, I-580, and I-880 are visible. The map is sourced from OpenStreetMap and ODbL.

NEW JERSEY

BOSTON

HOW TO DECIDE

- Calculated the centre of all the Pizza Places (That huge green circle)
- Then Calculated the DIstance from each Pizza Place to the centre
- Then ranked the cities According to the lowest distances

RESULTS

- New York
- Jersey City
- San Francisco
- Boston
- Chicago
